Dr. Gogne has a special interest in working with women presenting with both substance use disorders and psychiatric issues, and has experience with treatment of trauma and dialectical behavioral therapy. Dr. Gogne provides teleconsultation for RI MomsPRN, including diagnostic support, treatment planning and medication guidance in the perinatal period. She also serves as RI MomsPRN point person for engaging with and treating pregnant and postpartum women with substance use disorders.

Eva Ray, LCSW

Eva Ray is a licensed clinical social worker with a focus in perinatal mental health. Eva received her undergraduate degree in Sociology from the University of Massachusetts Amherst and completed her Master’s in Social Work at the University of California Los Angeles’ Luskin School of Public Affairs. Prior to joining Women & Infants RI MomsPRN team, she held a position as Integrated Behavioral Health Clinician in Boston Medical Center’s Mother-Child Wellness Clinical & Research Center, providing individual and couples therapy to pregnant and postpartum women. Her clinical and research interests include women’s mental health, infant mental health, trauma and toxic stress. Eva provides primary coverage of the RI MomsPRN telephone consultation line, including triage and information and referral services. She is the voice you will hear when you call RI MomsPRN and will assist in connecting you to services, including arranging a call-back from the perinatal psychiatrist.

Cynthia Battle, PhD

Cynthia Battle, PhD, is a research psychologist in the Center for Women’s Behavioral Health. She is an associate professor of psychiatry and human behavior (research) at The Warren Alpert Medical School of Brown University. Dr. Battle received her PhD in clinical psychology from the University of Massachusetts Amherst and completed both her clinical internship and treatment research fellowship at Brown University. Dr. Battle specializes in women’s mental health, specifically depression, anxiety and bipolar disorder occurring during pregnancy and the postpartum period. She has conducted several federally funded studies focused on developing new non-pharmacologic treatments for perinatal women, including interventions that utilize yoga, physical activity and home-based treatment. She is particularly interested in finding ways to make treatment more accessible and acceptable to pregnant and postpartum women, including women from diverse cultural groups. Dr. Battle is also on the staff at Butler Hospital. As part of RI MomsPRN, Dr. Battle assist with project development and implementation at the Women & Infants site, as well as data quality monitoring.
