Draft Process: Care Transitions to/from Hospital and ED

Purpose: To establish a process for coordinating patient care during and after transitions to acute care settings

A. Hospital Admissions
<Define & describe admission process used and staff responsible (multiple processes may apply)>

1. Hospital admission process - <direct, hospitalist, scheduled, unplanned, through ED, etc.>
2. Standard documentation provided to hospital for admission <summaries, referrals, notes, reason, special requests, admit orders, shared EHR, etc.>
3. Method of providing documentation to hospital <direct electronic interface, through HIE, fax, patient carries materials, phone calls to hospitalist, shared EHR, etc.>
4. Method of noting admissions in the practice EHR or chart <ability to obtain list of admitted patients from EHR or chart (see below)>

B. Hospital Stay
<Define & describe communication process used, staff responsible (multiple processes may apply)>

1. Agreements with hospitals to obtain daily Census lists <frequency & method of receipt>
2. Information received <calls with attending and/or consulting specialists, status updates, consult notes, hospital rounds, in-hospital consultations, etc.>
3. Information sent <notes, test results, meds, allergies, all consultation models mentioned above>
4. Information exchange <electronic, fax, HIE, phone, in-person consults, patient/family, etc.>
5. After-hours information exchange <on-call provider, 24/7 access to EHR, phone calls, etc.>

C. Hospital Discharge
<Define & describe discharge process used and staff responsible (multiple processes may apply)>

1. Notification of discharge from hospital
   a. Discharge list from hospital (or plans) <push by hospital/plans, pull by practice, combination, etc.>
   b. Content <discharge summary, interim letter, other>
   c. Method <direct electronic push, HIE push, faxed push, pull by the practice, access to hospital system, shared EHR, payer portals, sent with patient, other>
   d. Added to patient record <scanned in, electronically attached, etc.>
   e. Time frame <received within XX days from discharge>
2. Actions taken <patient call, call with hospitalist, contact consulting specialist(s), contact with discharge/case manager, scheduled follow up, house call, other>
3. Time frame for follow up <XX days within 30 days period after discharge>

D. ED Visits
<Define & describe communication process used and staff responsible (multiple processes may apply)>

1. Agreements with ED to <contact PCP, provide daily lists>
2. Information received <calls with ER physician and/or consulting specialists, status updates, ED summary notes, etc.>
3. Information sent <notes, test results, meds, allergies, phone consultation>
4. Information exchange <electronic, fax, HIE, phone, in-person consults, etc.>
### E. ED Discharge

<Define & describe discharge process used and staff responsible (multiple processes may apply)>

1. Notification of discharge from ED
   a. Discharge list from ED (or plans) **<push by hospital/plans, pull by practice, combination, etc.>**
   b. Content **<discharge summary, interim letter, other>**
   c. Method **<direct electronic push, HIE push, faxed push, pull by the practice, access to hospital system, shared EHR, payer portals, sent with patient, other>**
   d. Added to patient record **<scanned in, electronically attached, etc.>**
   e. Time frame **<received within XX days from visit>**

2. Actions taken **<patient call, call with ED, contact consulting specialist(s), contact with discharge/case manager, scheduled follow up, house call, other>**

3. Time frame for follow up **<XX days after discharge>**

Approved By:

Effective: 6/15/2017
Revised:

### Other areas for practice consideration:

1. **OHIC cost management strategies:** As practices develop and implement Transition of Care Policies and work flows, practices will want to refer to the current OHIC cost management strategies that provide added time frame requirements. Eighty percent of the cost management strategies must be met by October of your 3rd year in the CTC contract. Note: OHIC cost management strategies may be updated on a regular basis and requirements increase based on number of years a practice has been in a transformation program.

2) **Transition from pediatric to adult:**
Based on practice type, transitions of care can additionally include development and implementation of a written care plan for young adults and adolescent patients with complex needs transitioning to adult care; see resource document “Incorporating Pediatric to Adult Transitions into NCQA PCMH”.

Practices electing this care coordination and care transitions competency “credit” will want to be able to document evidence of implementation.
