ADHD Coding Fact Sheet for Primary Care Clinicians

Initial assessment usually involves time determining the differential diagnosis, a diagnostic plan, and potential treatment options. Therefore, most clinicians will report either an office/outpatient evaluation and management (E/M) code using time as the key factor* or a consultation code for the initial assessment.

Office or Other Outpatient E/M Codes

<table>
<thead>
<tr>
<th>Code Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201/99202/99203/99204/99205</td>
<td>Use for new† patients only; require 3 of 3 key components or greater than 50 percent of the visit spent in counseling or coordinating care.</td>
</tr>
<tr>
<td>99212/99213/99214/99215</td>
<td>Use for established patients; require 2 of 3 key components or greater than 50 percent of the visit spent in counseling or coordinating care.</td>
</tr>
</tbody>
</table>

Office or Other Outpatient Consultation Codes

<table>
<thead>
<tr>
<th>Code Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>99241/99242/99243/99244/99245</td>
<td>Use for new or established patients; appropriate to report if another physician or other appropriate source (ie, school nurse, psychologist) requests an opinion regarding a child potentially having ADHD. Require 3 of 3 key components or greater than 50 percent of the visit spent in counseling or coordinating care.</td>
</tr>
</tbody>
</table>

NOTE: Use of these codes requires the following:
- Written or verbal request for consultation is documented in the patient chart.
- Consultant’s opinion as well as any services ordered or performed are documented in the patient chart.
- Consultant’s opinion and any services that are performed are prepared in a written report, which is sent to the requesting physician or other appropriate source.

Prolonged Physician Services Codes

<table>
<thead>
<tr>
<th>Code Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>99354/99355</td>
<td>Use for outpatient face-to-face prolonged services.</td>
</tr>
<tr>
<td>99358/99359</td>
<td>Use for non-face-to-face prolonged services in any setting.</td>
</tr>
</tbody>
</table>

- Used when a physician provides prolonged services beyond the usual service (ie, beyond the typical time).
- An alternate to using time as the key factor with the office/outpatient E/M codes (99201–99215).
- Time spent does not have to be continuous.
- Codes are “add-on” codes, meaning they are reported separately in addition to the appropriate code for the service provided (eg, office or other outpatient E/M codes, 99201–99215).
- If the physician spends at least 30 and no more than 74 minutes more than the typical time associated with the reported E/M code, he or she can report 99354 (for face-to-face contact) or 99358 (for non-face-to-face contact). Codes 99355 (each additional 30 minutes of face-to-face prolonged service) and 99359 (each additional 30 minutes of non-face-to-face prolonged service) are used to report each additional 30 minutes of service beyond the first 74 minutes.
- Prolonged service of less than 15 minutes beyond the first hour or less then 15 minutes beyond the final 30 minutes is not reported separately.

---

*Time can be used as the key factor in determining a level of service when counseling and/or coordinating care constitute more than 50% of the encounter.
†A new patient is defined as one who has not received any professional services from a physician, or another physician of the same specialty who belongs to the same group practice, within the past 3 years (Principles of CPT Coding [second edition], American Medical Association, 2001).

The recommendations in this publication do not indicate an exclusive course of treatment or serve as a standard of medical care. Variations, taking into account individual circumstances, may be appropriate.
ADHD Coding Fact Sheet for Primary Care Clinicians

Case Management Services Codes

99361/99362  Use to report a medical conference among the physician and an interdisciplinary team of health professionals to coordinate activities of patient care (patient not present).

99371/99372/99373  Use to report telephone calls made by the physician to patient or parent, for consultation or medical management, or for coordinating medical management with other health care professionals.

Central Nervous System Assessments/Tests Codes

96100  Use to report psychological testing, per hour; includes psychodiagnostic assessment of personality, psychopathology, emotionality, intellectual abilities (e.g., WAIS-R, Rorschach test, MMPI).

96110  Use to report limited developmental testing with interpretation and report (e.g., Developmental Screening Test II, Early Language Milestone Screen).

96115  Use to report neurobehavioral status examination with interpretation and report, per hour (e.g., Conners Continuous Performance Test, Hawthorne Test).

Other Psychiatric Services or Procedures Codes

90862  Use to report pharmacologic management, including prescription, use, and review of medication with no more than minimal medical psychotherapy (e.g., Ritalin check).

90887  Use to report interpretation or explanation of results of psychiatric, other medical examinations or procedures, or other accumulated data to patient's family/guardian(s), or advising them how to assist patient.

International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) and Diagnostic and Statistical Manual for Primary Care (DSM-PC) Codes

- Before ADHD is diagnosed, do not use “rule out ADHD” as the diagnosis. Use as many diagnosis codes as apply to document the patient’s complexity and report the patient’s symptoms and/or adverse environmental circumstances.
- Once a definitive ADHD diagnosis is established, report the appropriate definitive diagnosis code(s) as the primary code, plus any other symptoms that the patient is exhibiting as secondary diagnoses.
- Counseling diagnosis codes can be used when the patient is present or when counseling the parent/guardian(s) when the patient is not physically present.

ICD-9-CM Codes

<table>
<thead>
<tr>
<th>Code</th>
<th>Disorder Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>293.84</td>
<td>Organic anxiety syndrome</td>
</tr>
<tr>
<td>300.00</td>
<td>Anxiety state, unspecified</td>

</tbody>
</table>
NOTE: The ICD-9-CM codes below are used to deal with occasions when circumstances other than a disease or injury are recorded as "diagnoses" or "problems." Some carriers may request supporting documentation for the reporting of V codes.

V40.0 Problems with learning
V40.1 Problems with communication (including speech)
V40.3 Mental and behavioral problems; other behavioral problems
V40.9 Unspecified mental or behavioral problem
V60.0 Lack of housing
V60.1 Inadequate housing
V60.2 Inadequate material resources
V60.8 Other specified housing or economic circumstances
V61.20 Counseling for parent-child problem, unspecified
V61.29 Parent-child problems; other
V61.49 Health problems with family; other
V61.8 Health problems within family; other specified family circumstances

V61.9 Health problems within family; unspecified family circumstances
V62.0 Other psychosocial circumstances; unemployment
V62.5 Other psychosocial circumstances; legal circumstances
V62.81 Interpersonal problems, NEC
V62.82 Bereavement, uncomplicated
V62.89 Other psychological or physical stress, NEC; other
V62.9 Unspecified psychosocial circumstance
V65.49 Other specified counseling
V71.02 Observation for suspected mental condition; childhood or adolescent antisocial behavior

DSM-PC Codes

300.01 Panic disorder
300.02 Generalized anxiety disorder
300.23 Social phobia
300.29 Specific phobia
307.0 Stuttering
307.9 Communication disorder, not otherwise specified (NOS)
308.3 Acute stress disorder
309.21 Separation anxiety disorder
309.81 Posttraumatic stress disorder
312.81 Conduct disorder, childhood onset
312.82 Conduct disorder, adolescent onset
312.9 Disruptive behavior disorder, NOS
313.81 Oppositional-defiant disorder
314.00 Predominantly Inattentive type
314.01 Predominantly Hyperactive-Impulsive type
314.02 Combined type
314.9 Attention-deficit/hyperactivity disorder, NOS
315.0 Reading disorder (developmental reading disorder)
315.1 Mathematics disorder (developmental arithmetic disorder)
315.2 Disorder of written expression (developmental expressive disorder)
315.31 Expressive language disorder
315.32 Mixed receptive-expressive language disorder
315.39 Phonologic disorder
315.4 Developmental coordination disorder

315.9 Learning disorder, NOS
781.3 Developmental coordination problem
V40.0 Learning problem
V40.1 Speech and language problem
V40.2 Anxiety problem
V40.3 Hyperactive/impulsive behavior problem
V40.3 Inattention problem
V40.3 Sadness problem
V62.3 Developmental/cognitive problem
V62.82 Bereavement
V65.4 Aggressive/oppositional variation
V65.4 Developmental/cognitive variation
V65.49 Aggressive/oppositional variation
V65.49 Anxious variation
V65.49 Developmental coordination variation
V65.49 Hyperactive/impulsive variation
V65.49 Inattention variation
V65.49 Learning variation
V65.49 Negative emotional behavior variation
V65.49 Sadness variation
V65.49 Secretive antisocial behaviors variation
V65.49 Speech and language variation
V71.02 Aggressive/oppositional problem
V71.02 Negative emotional behavior problem
V71.02 Secretive antisocial behaviors problem
