8,697

Year 3:

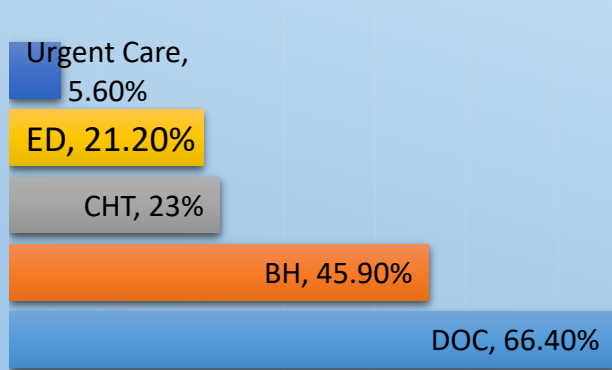

5,459 *

Screenings by site

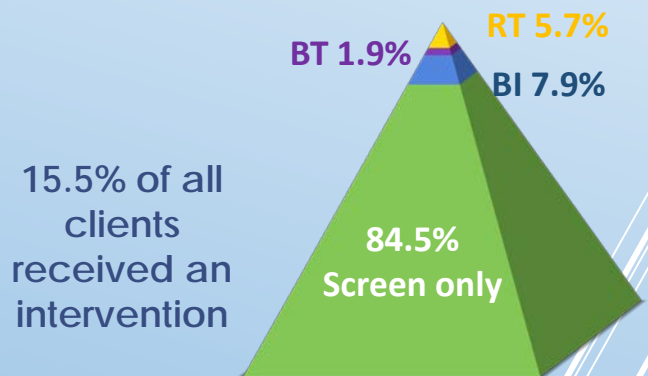

3,943 Clients Screened positive and received an intervention

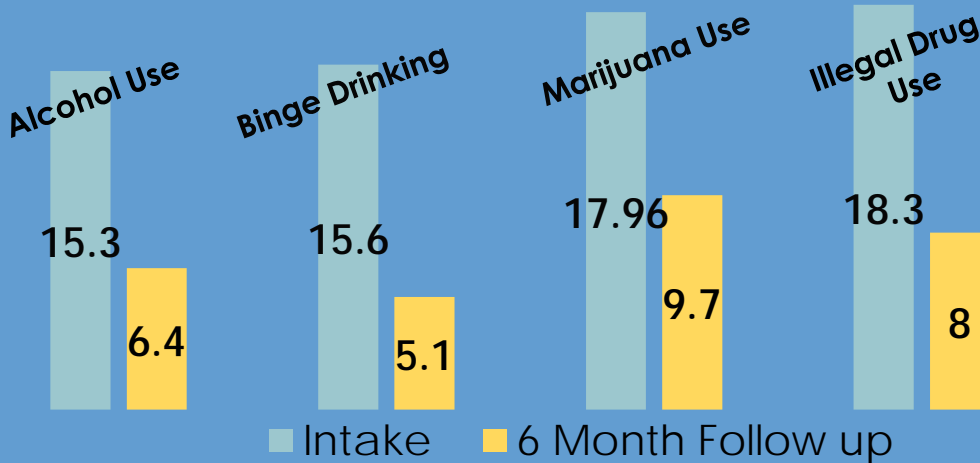

Positive Screens by Site Type

Interventions Provided

Average # of reported days in past month for...

A sample of clients who reported alcohol use, binge drinking, marijuana use, and illegal drug use at intake reported **significantly fewer** days of use six months later

Average decrease of 40%

Acknowledging our Teams' Dedication and Perseverance during COVID-19

- Sites quickly identified ways to conduct SBIRT safely, using telemedicine approaches for screening and follow up
- Staff maximized remote training opportunities during this time
 - 134 people completed SBIRT modules 1 & 2
 - 12 people became certified SBIRT trainers
- While providing thousands of “Be Safe Kits” to those in need, Family Service of RI screened almost 400 individuals for SUD and connected to additional resources when necessary
- The Providence Center has required SBIRT training as part of their orientation for all new hires
- Staff returned to conduct in-person screenings when they felt it was safe to do so

Thank you to our partners!
