

Are You Looking for Results for a Patient's Colonoscopy? Find it in CurrentCare!

If your patient is enrolled in CurrentCare and had a colonoscopy completed by a facility that is a data-sharing partner with CurrentCare, their results may be available in the CurrentCare Viewer:

- Check the **Other/Miscellaneous** Section of **Lab Results** to find a report with the colonoscopy results (*Note: the name of the report may be different depending on the organization that completed the procedure*):

- Lab Results
- Encounters
- Documents
- Medications
- Allergies & Alerts
- Conditions
- Diagnostic Imaging
- EKG Imaging
- Discharge Summary

Collected: 4/6/2016 Specimen #: 2-K5-16-55555 Received: 4/6/2016 1:48:00 PM Organ Or Tissue A Polyp,
Rectal Final Diagnosis Rectum, polyp, biopsy: - Fragments of tubular adenoma. Ruisheng Yao, MD, PhD Electronically signed:
04/07/16/ RY Clinical Information Clinical Diagnosis/ History: Colonoscopy. Clinical Procedure: Colonoscopy with snare. Gross
Description Received in formalin labeled with the patient's name and biopsy rectal polyp are two tan-pink irregular soft tissue
fragments which measure 0.4 and 0.7 cm. The suspected point of excision is inked blue on the larger fragment and black on the
smaller fragment. The larger fragment is bisected and the specimen is submitted in its entirety in A1. CR/ah

If a pathology report is **not** available in the Lab Results section, you may also find information in:

- The **Documents** section. The organization specific CCDs (Medical Record Summaries) may include a colonoscopy result and/or a pathology report that may not be available in the Lab Results section
- The **Encounters** Section: If a patient had a colonoscopy completed at a facility that shares data (but does not have a laboratory results interface), you may be able to check the *Reason for Visit* to see when and where they had the procedure done.
